INDEX TO VOLUME 48

*Starred items are "Shorter Notes"

Abdelaziz, Nazar H. *Spectral properties of some operators in a Banach space with the decomposition property*, 344.

Albert, J.H. *Genericity of simple eigenvalues for elliptic PDE's*, 413.

Atalla, R.E. *Addendum to "On the multiplicative behavior of regular matrices"*, 268.

Babalola, V.A. *Generation of abstract-parameter semigroups*, 173.

Bagby, Richard J. *An extended inequality for the maximal function*, 419.

Baker, James D. *Representation of linear functionals on quasi-continuous functions*, 120.

Bekes, Robert A. *Reductive algebras of compact operators*, 365.

Bellamy, David P. *Weak chainability of pseudocones*, 476.

Bleick, W.E. and Wang, Peter C.C. *Erratum to "Asymptotics of Stirling numbers of the second kind"*, 518.

Block, Louis. *Morse-Smale endomorphisms of the circle*, 457.

Book, Stephen A. *An extension of the Erdös-Rényi new law of large numbers*, 438.

Brown, Richard L.W. *Stiefel-Whitney numbers and maps cobordant to embeddings*, 245.

Bruckner, A.M. *On transformations of derivatives*, 101.

Buoni, John J. *The variation of Browder's essential spectrum*, 140.

Chalmers, Bruce L. *A representation of generalized infrapolynomials*, 358.

Chan, Y. K. *A short proof of an existence theorem in constructive measure theory*, 435.

Chi, G.Y.H. *A geometric characterization of Fréchet spaces with the Radon-Nikodym property*, 371.

*Daughtry, John. *Hyperinvariant subspaces for approximately idempotent operators*, 262.

Denef, J. *Hilbert's tenth problem for quadratic rings*, 214.

*Diestel, J. L_X^1 *is weakly compactly generated if* X *is*, 508.

Eerkes, Gary L. *Rings of equivalent dominant and codominant dimensions*, 297.

Erdös, Paul and Nathanson, Melvyn B. *Maximal asymptotic nonbases*, 57.

Evans, Richard B. *Asymptotic behavior of perturbed autonomous linear functional differential equations*, 351.

Fabes, E.B., Littman, W. and Riviere, N.M. *Commutators of singular integrals with C^1-kernels*, 397.

Farkas, Daniel R. *A note on locally finite group algebras*, 26.

Fialkow, L.A. *A note on direct sums of quasinilpotent operators*, 125.

Flaherty, F.J. *Lorentzian manifolds of nonpositive curvature. II*, 199.

Franklin, S.P. *On products of countably compact spaces*, 236.

Gauger, Michael A. *Automorphisms compatible with group actions*, 251.

Gerstenhaber, Murray and Myung, Hyo Chul. *On commutative power-associative nil-algebras of low dimension*, 29.

Goelman, Don. *The critical set of the reduced norm, as an algebraic set*, 307.

Hajek, Darrell W. and Todd, Aaron R. *Lightly compact spaces and infra H-closed spaces*, 479.

Hajnal, A. and Juhász, I. *On the products of weakly Lindelöf spaces*, 454.

Halperin, Stephen and Toledo, Domingo. *The product formula for Stiefel-Whitney homology classes*, 239.

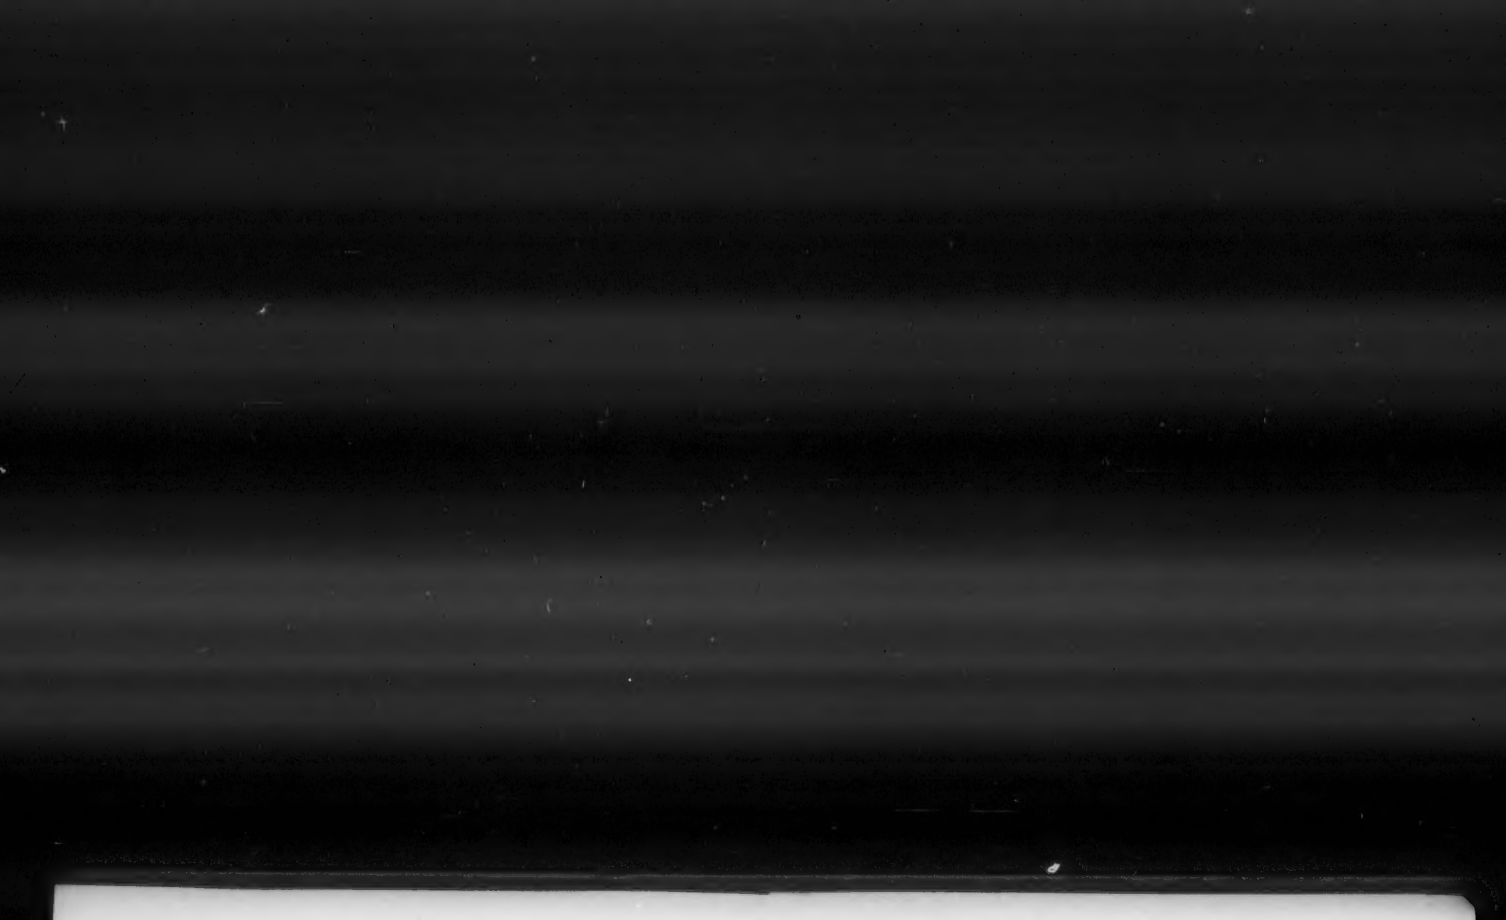
Halperin, Stephen and Toledo, Domingo. *The product formula for Stiefel-Whitney homology classes*, 239.

Hausen, Jutta. *Automorphism groups of abelian p-groups*, 66.
Hempel, John. *Free cyclic actions on* $S^1 \times S^1 \times S^1$, 221.
Herrero, D.A. and Sherman, M.J. *Noncyclic vectors for* S^*, 193.
Herrington, Larry L. and Long, Paul E. *Characterizations of H-closed spaces*, 469.
Ho, C.Y. *On the p-elements of a finite group*, 61.
Homell, James. *A note on the relationship between Weil and Cartier divisors*, 276.
Hovstad, Rolf M. *Solution of a convergence problem in the theory of T-fractions*, 337.
Ismail, Mourad El-Houssieny. *A sequence-to-function analogue of the Hausdorff means for double sequences: the* $[J, f(x, y)]$ *means*, 403.
Istrăţescu, Ana I. and Istrăţescu, Vasile I. *On the existence of a solution of* $f(x) = kx$ *for a continuous not necessarily linear operator*, 197.
Istrăţescu, Vasile I. See Istrăţescu, Ana I.
Ito, Ryuichi. *On type-sets of torsion-free abelian groups of rank 2*, 39.
Johnson, R. Warren. *Homogeneous Lie algebras and expanding automorphisms*, 292.
Juhász, I. See Hajnal, A.
Kahan, W. *Spectra of nearly Hermitian matrices*, 11.
Kammler, David W. *A minimal decay rate for solutions of stable nth order homogeneous differential equations with constant coefficients*, 145.
Kantorovitz, S. and Pei, K.J. *Representation of* C^n*-operators*, 152.
Karamzadeh, O.A.S. *Projective maximal right ideals of self-injective rings*, 286.
Khabbaz, S.A. and Toubassi, E.H. Ext(A, T) *as a module over* End(T), 269.
Kim, Dong S. *Erratum to "Boundedly holomorphic convex Riemann domain"*, 516.
King, R.C. *Generalised Vandermonde determinants and Schur functions*, 53.
Knoblauch, Tom. *Imbedding compact 3-manifolds in* E^3, 447.
Kohli, J.K. *Finite-to-one maps and open extensions of maps*, 464.
Kreyszig, Erwin and Pendl, Alois. *Spherical curves and their analogues in affine differential geometry*, 423.
Lachlan, A.H. wtt*-complete sets are not necessarily* tt*-complete*, 429.
Lambert, Joseph M. *Continuous metric projections*, 179.
*Law, Alan G. and Sledd, M.B. *Normalizing orthogonal polynomials by using their recurrence coefficients*, 505.
Ling, William H. *On simultaneous Chebyshev approximation in the "sum" norm*, 185.
Littman, W. See Fabes, E.B.
Long, Paul E. See Herrington, Larry L.
Luna, George. *A remark on the nonlinear complementarity problem*, 132.
*Marić, V. and Tomić, M. *A new proof of Bernstein's inequality for Legendre polynomials*, 511.
Matula, David W. *A uniform set covering lemma*, 255.
Metzger, T.A. and Rajeswara Rao, K.V. *Fuchsian groups of convergence type and nontangential growth of automorphic forms*, 153.
Mohanty, S.P. *On consecutive integer solutions for* $y^2 - k = x^3$, 281.
Moody, R.V. *Macdonald identities and Euclidean Lie algebras*, 43.
Myung, Hyo Chul. See Gerstenhaber, Murray.
Nathanson, Melvyn B. *Linear recurrences and uniform distribution*, 289.
———. See Erdős, Paul.
Nayak, M. K. and Srinivasan, T.P. *Scalar and vector valued premeasures*, 391.
Neuberger, J.W. *Differentiability of the exponential of a member of a near-ring*, 98.
Neumann, Dean A. *Classification of continuous flows on 2-manifolds*, 73.
*Newman, D.J. *A simple proof of Wiener's* $1/f$ *theorem*, 264.
Nico, William R. *Height of operands over monoids satisfying the d.c.c. on orbits*, 313.
Passow, Eli and Raymon, Louis. *The degree of piecewise monotone interpolation*, 409.


Pei, K.J. See Kantorovitz, S.
Pendl, Alois. See Kreyszig, Erwin.
Pigno, Louis. *Erratum to "Restrictions of L^p transforms"*, 515.
Pothoven, Kenneth L. *Reflexive tensor products and spaces of operators*, 108.
Rajeswara Rao, K.V. See Metzger, T.A.
Ramamurthi, V.S. *On the injectivity and flatness of certain cyclic modules*, 21.
Raymon, Louis. See Passow, Eli.
Riley, Charles A. *An extension of a theorem of Bessaga*, 231.
Riviere, N.M. See Fabes, E.B.
Rochberg, Richard. *Continuation of Riemann surfaces*, 82.
Rosenblum, Marvin and Rovnyak, James. *Restrictions of analytic functions*. I, 113.
Rovnyak, James. See Rosenblum, Marvin.
Sabella, Ralph R. *Spaces in which compact sets have countable local bases*, 499.
Sanders, Dean. *The dominion and separable subalgebras of finitely generated algebras*, 1.
Sarason, L. *A canonical transformation near a boundary point*, 189.
Schmidt, Wolfgang M. *The measure of the intersection of rotates of a set of the circle*, 18.
Sedziwy, Stanisław. *Periodic solutions of a system of nonlinear differential equations*, 328.
Sharma, R.R. *A measure differential inequality with applications*, 87.
Shelah, Saharon. *A two-cardinal theorem*, 207.
Sherman, M.J. See Herrero, D.A.
*Sledd, M.B. See Law, Alan G.
Slocum, Richard. *The Kline 2-sphere characterization—by definition*, 491.
Smith, Philip W. and Ward, J.D. *Restricted centers in $C(\Omega)$*, 165.
Srinivasan, T.P. See Nayak, M.K.
Stephens, N.M. *On the number of coprime solutions of $y^2 = x^3 + k$*, 325.
Stolarsky, Kenneth B. *Spherical distributions of N points with maximal distance sums are well spaced*, 203.
Straughan, Brian. *Further global nonexistence theorems for abstract nonlinear wave equations*, 381.
Sweedler, Moss Eisenberg. *When is the tensor product of algebras lcoal?*, 8.
Sweet, Lowell. *On the triviality of homogeneous algebras over an algebraically closed field*, 321.
Todd, Aaron R. See Hajek, Darrell W.
Toledo, Domingo. See Halperin, Stephen.
*Tomić, M. See Marić, V.
Tondra, Richard J. *The domain rank of a surface is countable*, 483.
Toubassi, E.H. See Khabbaz, S.A.
*Trimble, S.Y. *A coefficient inequality for convex univalent functions*, 266.
Troccolo, Joseph A. *$\mathfrak{F}$-projectors of finite solvable groups*, 33.
Wang, Peter C.C. See Bleick, W.E.
Ward, J.D. See Smith, Philip W.
Weinstein, Alan. *Erratum to "Distance spheres in complex projective spaces"*, 519.
*Wells, John C. *A note on a corollary of Sard's theorem*, 513.
White, H.E., Jr. *An example involving Baire spaces*, 228.
Wortman, Dennis H. *Interpolating sequences on convex curves in the open unit disc*, 157.
Yang, J.S. *Erratum to "On isomorphic groups and homeomorphic spaces"*, 517.
———, *Erratum to "Transformation groups of automorphisms of $C(X, G)$"*, 517.
